Faculty of Medicine Quality Assurance Unit

M. D. degree of Neurology

A. Basic Information

- Program Title: M. D. degree of Neurology
- Nature of the program: Single.
- **Responsible Department:** Department of Neurology and Psychiatry Department- Faculty of Medicine- Aswan University.
- Program Academic Director (Scientific Supervisior):

Prof. Dr. Eman Khedr.

- Coordinator (s):
 - Principle coordinator: Abeer Abdelhady

Assistant coordinator (s) Ahmed Abdelwarith,

DR. Bastawy Elfawal

- **♣** Date of Approval by the Faculty of Medicine Council of Aswan University: **23**-9-2016.
- **♣** Date of most recent approval of program specification by the Faculty of Medicine Council of Aswan University: 22-10-2017.
- Total number of courses: Obligatory 7 courses

First part: 6 courses.
Second part: 1course
Two elective courses

B. Professional Information

1- Program aims

1/1 To enable candidates to keep with international update standards of patients care of all Neurological disorders by mastering high level of clinical skills, bedside patient care skills, in addition to update medical knowledge as well as clinical experience and competence in the area of common, infrequent, and rare neurological disorders, common and infrequent neurological emergencies, diagnostic tools of neuroelectrophysiology studies and neuroimaging studies and interventional neurology, and enabling the candidates of making appropriate referrals to a sub-specialist for consultation or intervention.

1/2 Provide candidate with fundamental updated details knowledge of neurological emergencies and stroke unit care medicine as regards; mastering dealing with critically ill stroke patients associated with multiple medical conditions or complicated cases and acute respiratory affection or disturbed conscious level related to neurological disorders whatever their frequency in clinical practice , ICU equipments, techniques, indications, contraindications and training skills of different intensive care techniques and interventions .

I/3- To enable candidates to select methodology and perform high standard scientific medical research with ethical issues and how to proceed with publication in indexed medical journals.

I/4- To enabling them to have professional careers as a consultant in Egypt.

- Making them recognized as a consultant abroad.
- Enabling them to continue self learning in subspecialties.
- Enabling them to master different research methodology and do their own.

2-Intended learning outcomes (ILOs) for the whole program:

2/1Knowledge and understanding:

- A. Demonstrate in-depth knowledge and understanding of theories, basics and updated biomedical, clinical epidemiological and socio behavioral science relevant to his Neurology as well as the evidence based application of this knowledge to patient care.
- B. Explain basics, methodology, tools and ethics of scientific medical, clinical research.
- C. Mention ethical, medico logical principles and bylaws relevant to his practice in the field of Neurology
- D. Mention principles and measurements of quality assurance and quality improvement in medical education and in clinical practice of the concerned Neurology.
- E. Mention health care system, public health and health policy, issues relevant to this speciality and principles and methods of system based improvement of patient care in common health problems of the field of Neurology.

2/2 Intellectual outcomes

- A. Apply the basic and clinically supportive sciences which are appropriate to Neurology related conditions / problem / topics.
- B. Demonstrate an investigatory and analytic thinking "problem solving "approaches to clinical situation related to Neurology.
- C. Plan research projects.
- D. Write scientific papers.
- E. Participate in clinical risk management as a part of clinical governance.
- F. Plan for quality improvement in the field of medical education and clinical practice in Neurology.
- G. Create / innovate plans, systems, and other issues for improvement of performance in his practice in Neurology.
- H. Present and defend his / her data in front of a panel of experts.
- I. Formulate management plans and alternative decisions in different situations in the field of the Neurology.

2/3 Skills 2/3/1 Practical skills (Patient Care)

A. Provide extensive level of patient care that is compassionate, appropriate, and effective for the treatment of Neurology health problems and the promotion of health. *p.s.* Extensive level means in-depth understanding from basic science to evidence — based clinical application and possession of skills to manage independently all problems in field of Neurology in practice.

- B. provides extensive level of patient care for patients with all common diagnoses and for uncomplicated procedures related to Neurology.
- C. provides extensive level of patient care for non-routine, complicated Neurology patients and under increasingly difficult circumstances, while demonstrating compassionate, appropriate and effective care.
- D. Perform diagnostic and therapeutic procedures considered essential in the field of Neurology
- E. Handles unexpected complications, while demonstrating compassion and sensitivity to patient needs and concerns.
- **F.** Communicate effectively and demonstrate caring and respectful behaviors when interacting with patients and their families in Neurology related situations.
- G, Gather essential and accurate information about patients of Neurology related conditions.
- H. Make informed decisions about diagnostic and therapeutic interventions based on patient information and preferences, up-to-date scientific evidence and clinical judgment for Neurology related conditions.

- I. Develop and carry out patient management plans for Neurology related conditions.
- J. Counsel and educate patients and their families about Neurology related conditions.
- K. Use information technology to support patient care decisions and patient education in all Neurology related clinical situations.
- L. Perform competently all medical and invasive procedures considered essential for Neurology related conditions / area of practices.
- M. Provide health care services aimed at preventing the Neurology related health problems.
- **N.** Lead health care professionals, including those from other disciplines, to provide patient-focused care in Neurology related conditions.
- O. Write competently all forms of Neurology patient charts and sheets including reports evaluating these charts and sheets. (Write and evaluate a consultation note, Inform patients of a diagnosis and therapeutic plan, completing and evaluating comprehensive, timely and legible medical records)

2/3/2 General skills

Including:

- Practice-based Learning and Improvement
- Interpersonal and Communication Skills
- Professionalism
- Systems-based Practice

Practice-Based Learning and Improvement

- A. Demonstrate the competency of continuous evaluation of different types of Neurology care provision to patients in the different area of his field
- B. Appraise scientific evidence.
- C. Continuously improve patient care based on constant selfevaluation and <u>life-long learning in Neurology.</u>
- D. Participate in clinical audit and research projects.
- E. Practice skills of evidence-based Medicine (EBM).
- F. Educate and evaluate students, residents and other health professionals.
- G.Design logbooks.
- H.Design clinical guidelines and standard protocols of management in Neurology.
- I. Appraise evidence from scientific studies related to the Neurology patients' health problems.

- J. Apply knowledge of study designs and statistical methods to the appraisal of clinical studies in Neurology.
- K. Use information technology to manage information, access online medical information; for the important topics in Neurology.

Interpersonal and Communication Skills

- L. Master interpersonal and communication skills that result in the effective <u>exchange of information and collaboration</u> with Neurology patients, their families, and health professionals, including:-
 - Present a case.
 - Write a consultation note.
 - <u>Inform patients</u> of a diagnosis and therapeutic plan completing and maintaining comprehensive.
 - Timely and legible medical records.
 - Teamwork skills.
 - M. Create and sustain a therapeutic and ethically sound relationship with patients.
 - N. Elicit and provide information using effective nonverbal, explanatory, questioning, and writing skills.
 - O. Work effectively with others as a member or leader of a health care team or other professional group.

Professionalism

P. Demonstrate respect, compassion, and integrity; a responsiveness to the needs of patients and society.

- Q. Demonstrate a commitment to ethical principles including provision or withholding of clinical care, confidentiality of patient information, informed consent, and business practices.
- R. Demonstrate sensitivity and responsiveness to patients' culture, age, gender, and disabilities.

Systems-Based Practice

- S. Work effectively in health care delivery settings and systems related to Neurology including good administrative and time management.
- T. Practice cost-effective health care and resource allocation that does not compromise quality of care in Neurology.
- U. Advocate for quality patient care and assist Neurology patients in dealing with system complexities.
- V. Design, monitor and evaluate specification of under and post graduate Neurology course and programs.
- W. Act as a chair man for scientific meetings including time management.

3- Program Academic Reference Standards (ARS) (Annex 2)

Academic standards for Medical Doctorate (MD) degree in Neurology

Aswan Faculty of Medicine developed MD degree programs' academic standards for different clinical specialties.

In preparing these standards, the General Academic Reference Standards for post graduate programs (GARS) were adopted.

These standards set out the graduate attributes and academic characteristics that are expected to be achieved by the end of the program.

These standards were approved by the faculty council on 20/3/2010. These standards were revised and approved without changes by the Faculty Council on 23-9-2014.

4- Program External References (Benchmarks)

(Accreditation Graduate Medical 1.ACGME Council for Education).

http://www.acgme.org/acWebsite/navPages/nav Public.asp 2. American Board of NEUROLOGY_

(Post residency education programs .

5- Program Structure

A. Duration of program: 4-6 years

B. Structure of the program:

Total number of credit points: = 420 CP

Master degree: 180 credit point

Didactic #: 37 (23.1%), practical 123 (76.9%), total 160 CP

Thesis and researches: 80 CP (33.3%)

First part

Didactic 10 (100%), practical 0 (0 %), total 10 CP

Second part

Didactic 24, (16.3 %), practical 123 (83.7 %), total 147 CP

Elective courses: 3 credit points

#Didactic (lectures, seminars, tutorial)

According the currently applied bylaws:

Total courses: 160 credit point

Compulsory courses: 157 credit point (98.1%)

Elective courses: 3 credit point (1.9%)

	Credit point	% from total	
Basic science courses	10	4.1%	
Humanity and social courses	3	1.2%	
Speciality courses	147	61.3%	
Others (Computer,)	-	0	
Field training	123	51.3%	
Thesis	40	16.7%	
2 published researches	40	16.7%	
Master degree	180		

C- Program Time Table

Duration of program 4 years divided into

o Part 1

Program-related basic science courses

Program-related essential courses

- Medical statistic
- Research methodology
- Medicolegal Aspects and Ethics in Medical Practice and Scientific Research

Students are allowed to sit the exams of these courses after 6 months from applying to the M D degree.

Students are allowed to sit the exams of the remaining basic science courses after 12 months from applying to the MD degree.

Thesis and 2 published researches

For the M D thesis;

MD thesis subject should be officially registered within 1 year from application to the MD degree,

Discussion and acceptance of the thesis should not be set before 24 months from registering the M D subject; It could be discussed and accepted either before or after passing the second part of examination

o Part 2

Program –related speciality courses and ILOs Students are not allowed to sit the exams of these courses before 4 years from applying to the MD degree.

Two elective courses can be set during either the 1st or 2nd parts.

The students pass if they get 50% from the written exams and 60% from oral exams, 60% from clinical/practical exams of each course and 60% of summation of the written exams, oral and clinical /practical exams of each course

Total degrees 1700 marks.

500 marks for first part

1200 for second part

Written exam 40% - 70%.

Clinical/practical and oral exams 30% - 60%.

D- Curriculum Structure: (Courses):

Levels and courses of the program:

Courses and student work	Course	Core (Credit poir	nts
load list	Code	Lectures	training	total

Course 7	NEU320B			
Neurology				
Speciality Clinical Work	NEU320B		123	123
(123 CP)				
Total of second part		24	123	147

#Didactic (lectures, seminars, tutorial)

* Elective courses can be taken during either the 1st or 2nd parts.

Student work load calculation:

Work load hours are scheduled depending on the type of activities and targeted competences and skills in different courses

Elective Courses#:

- Advanced medical statistics.
- Evidence based medicine.
- Advanced infection control.
- Quality assurance of medical education.
- Quality assurance of clinical practice.
- -Hospital management

Two of the above mentioned courses are prerequisites for fulfillment of the degree.

3. Thesis / Researches:

40 CP are appointed to the completion and acceptance of the thesis.

**Another 40 points are appointed to acceptance or publication of one research from the thesis in international indexed medical journals or publication of 2 researches from the thesis in local specialized medical journals.

Course 7 Neurology

	%		Core	Credit poi	nts
Module/ Units' Titles' list	from total Marks	Level (Year)	Didactic	training	Total
-Module 1					
Neurological disorders	50%	1,2,3,4	12	64	76
-Module 2					
Neurological	14.6%	1,2,3,4	3.5	18.5	22
emergencies					
-Module 3	20.8%	1.2,3,4	5	22	27
Neuroelectrophysiolog					
y and Neuroimaging					
–Module 4	14.6%	2,3,4	3.5	18.5	22
Interventional					
Neurology					
Total (4 modules)	100%	1,2,3,4	24	123	147

6. Courses Contents (Annex 1)

The competency based objectives for each course/module/rotation are specified in conjunction with teaching/training methods, requirements for achieving these objectives and assessment methods.

See Annex 1 for detailed specifications for each course/ module **Annex 6 II: Program Matrix**

7-Admission requirements

- Admission Requirements (prerequisites) if any :
 - I. General Requirements:
 - Master degree in the speciality.
 - **II. Specific Requirements:**
 - Fluent in English (study language)

VACATIONS AND STUDY LEAVE

The current departmental policy is to give working residents 3 week leave prior to first/ second part exams.

FEES:

As regulated by the postgraduate studies rules and approved by the faculty vice dean of post graduate studies and the faculty and university councils.

8-Progression and completion requirements

- ♣ Examinations of the first part (Medical statistic, Research methodology and Medicolegal Aspects and Ethics in Medical Practice and Scientific Research) could be set at 6 months from registering to the MD degree.
- ♣ Students are allowed to sit the exams of the remaining essential courses of the first part after 12 months from applying to the MD degree.
- Examination of the second part cannot be set before 4 years from registering to the degree.
- ♣ Discussion of the MD thesis could be set after 2 years from officially registering the MD subject, either before or after setting the second part exams.
- The minimum duration of the program is 4 years.

The students are offered the degree when:

- 1. Passing the exams of all basic science, elective and speciality courses of this program as regulated by the post graduates approved rules by the faculty council.
- 2. Completing all scheduled CP and log book (minimum 80%).
- 3. Discussion and acceptance of the MD thesis.
- 4. Acceptance or publication of one research from the thesis in international indexed medical journals or publication of 2 researches from the thesis in local specialized medical journals.

9-Program assessment methods and rules (Annex IV)

Method	ILOs measured
Written examinations:	K & I
Structured essay questions Objective questions:	
MCQ Problem solving	
Clinical: Long/short cases OSCE	K ,I, P &G skills
Structured oral	K ,I &G skills
Logbook assessment	All
Research assignment	I &G skills

part			
Elective course 1	50	50	100
Elective course 2	50	50	100

^{* 25%} of the oral exam for assessment of logbook

500 marks for first part

1200 for second part

Written exam 40% (480 marks)

Clinical/practical and oral exams 60% (720 marks)

Elective courses 200

Examination system:

> First part:

- Written exam 2 hours in Medical Statistics and Research Methodology + oral examination
- Written exam 1 hours in Medicolegal Aspects and Ethics in Medical Practice and Scientific Research + oral examination.
- Written exam 2 hours in neurophysiology+ oral exam.
- Written exam 3 hours in Neuropathology of Neurological disorders& Genetics of Neurological disorders+ oral exam.
- Written exam 2 hours in neuropharmacology+ oral exam.
- Second part: Written exam four papers 3 hours in Neurology for each 120 marks + Oral exam (120 for investigations + 2 oral settings 60 marks for each)+ Clinical/Practical exam(240 marks for long case+2 short cases 120 marks for each).

> Elective courses

- Written exam one paper 1 hour in Elective course 1 + Oral
 & Practical exam
- Written exam one paper 1 hour in Elective course 2 + Oral
 & Practical exam

B. Write the introduction	Tutorial	Written examination
C. Write the methodology section	Tutorial	Written examination
D. Present the results	Tutorial	Written examination
E. Perform Discussion section	Tutorial	Written examination
F. Learn Authorship ethical rules	Tutorial	Written examination

4. Course contents (topic s/modules/rotation Course Matrix

Time Schedule: First Part

Topic	Covered ILOs			
	Knowledge		Practical skills	General Skills
	A	В	C	D
Introduction & proposal writing	G	А	А	A-F
Epidemiological Study designs	A,J	А	В,С	-
Screening & theoretical background	L	А	-	-
Screening practical	L	А	D	-
Sample size calculation	В	А	B,C	-
Research bias	Н	А	С	F
Ethics in research	E,F	А	С	F

5. Course Methods of teaching/learning:

- 1. Lectures
- 2. Assignments
- 3. Discussion
- 4. Exercises

6. Course assessment methods:

i. Assessment tools:

- 1. Written examination
- 2. Attendance and active participation
- 3. Class
- 4. Assignments
- **ii. Time schedule:** After 6 months from applying to the M D degree.
- iii. Marks: 50 (35 for written exam and 15 for oral exam).

7. List of references

i. Lectures notes

• Department lecture notes

ii. Essential books

 An epidemiologic Approach to Reproductive Health, CDC, FHI, and WHO Phyllis A. wingo, James E. Higgens, Goerge L. Rubin, and S. Christine Zahniser

iii. Recommended books

- Evidence Based Medicine How to practice and teach EBM.
- David Sachett, Sharon E. Straus, W.Scott Richardson,
 William Rosenberg R.Brain Haynes

iv. Periodicals, Web sites, ... etc

• Dissertation workshop open courseware JHSPH

8. Signatures

- ProfAli Zarzour	- Prof. Omyma El Gebaly
Date: 17-9-2017	Date: 17-9-2017

Course 3: Medicolegal Aspects and Ethics in Medical Practice and Scientific Research

Name of department:
Forensic medicine and clinical toxicology
Faculty of medicine
Aswan University
2016-2017

1. Course data

- Course Title: Medicolegal Aspects and Ethics in Medical Practice and Scientific Research
- Course code: FAC310C
- Speciality: General medicine, Special medicine, Pediatrics, Public health, Oncology and Rheumatology (1st part).
- Number of credit points: 1 credit point
- Department (s) delivering the course: Forensic Medicine and Clinical Toxicology
- Coordinator (s):
 - Course coordinator:

Prof. Wafaa Mohamed Abdel Moneium

- Assistant coordinator (s) Assist.

Prof. Amal Ali. Mohammed

- **Lange 19.** Date last reviewed: 17-9-2017
- Requirements (prerequisites) if any :
 - > Completed Master degree.

2. Course Aims

2.1-To describe the basic ethical and medicolegal principles and bylaws relevant to practice in the field of General medicine, Special medicine, Pediatrics, Public health, Oncology and Rheumatology

3. Intended learning outcomes (ILOs):

A knowledge and understanding

Competency and Skills	Methods of teaching/ learning	Methods of Evaluation
A. Mention principals of Taking consent.	Lecture and discussion	Oral &Written exam
B. Mention principals of Writing a death certificate	Lecture and discussion	Oral &Written exam
C. Mention principals of diagnosing death.	Lecture and discussion	Oral &Written exam
D. Mention principals of writing toxicological reports.	Lecture and discussion	Oral &Written exam
E. Explain principals of medical reports.	Lecture and discussion	Oral &Written exam
F. List indications and principals of induced emesis, gastric lavage and samples collection.	Lecture and discussion	Oral &Written exam

B. intellectual

Competency and Skills	Methods of teaching/ Learning	Methods of Evaluation
A. Present case , seminars in death certificate	Lecture and discussion	Oral &Written exam
B. Present case, seminars in toxicological cases	Lecture and discussion	Oral &Written exam

C. Practical skills

Competency and Skills	Methods of teaching/ Learning	Methods of Evaluation
A. Identify medical ethics and ethics in research.	Lecture and discussion	Reading Discussion
B. Prepare and write consent.	Lecture and discussion	Reading Discussion
C. Identify medical responsibilities.	Lecture and discussion	Reading Discussion
D. Write death certificate.	Lecture and discussion	Reading Discussion and active participation
E. Deal with a case of Suspicious death	Lecture and discussion	Reading Discussion and active participation
F. Perform gastric lavage, induce emesis, and obtain samples.		
G. Write medical and toxicological reports	Lecture and discussion	Reading Discussion and active participation
H. Develop and carry out		

patient management plans	
for Euthanaesia, and Organ	
Transplantation	
I. Counsel patients and their	
families about speciality	
related conditions including	
Permanent infirmities,	
Euthanasia, and Organ	
Transplantation	

D general skills

Competency and Skills	Methods of teaching/ Learning	Methods of Evaluation
A. Present a case.	Lecture and discussion	Global rating logbook
B. Write a consultation note	Lecture and discussion	Global rating logbook
C. Inform patients and maintaining comprehensive.	Lecture and discussion	Global rating logbook
D. Make timely and legible medical records	Lecture and discussion	Global rating logbook
E. Acquire the teamwork skills	Lecture and discussion	Global rating logbook

4. Course contents (topic s/modules/rotation Course Matrix

Time Schedule: First Part

Course 4, Neurophysiology

I. Course data

- **♣** Course Title: Neurophysiology
- ♣ Course code: [NEU303] ♣

Speciality is Neurology.

- Number of credit points: 2credit point, didactic 2 credit point (100%) and 0 practical.
 - Department (s) delivering the course: Physiology in conjunction with Neurology and Psychiatry department.
- Coordinator (s): Staff members of Physiology Department in conjunction with Neurology and Psychiatry Department as annually approved by both departments' councils.
- ♣ Principle coordinator: Prof Dr. Eman Khedr
- Assistant coordinator: Dr. Abeer Abdelhady.
 - **♣ Date last reviewed:** 17-9-2017.
- Requirements (prerequisites) if any:
- ♣ None.

2- Course Aims

2.1 The candidates acquire the neurophysiologic facts in details which are appropriate to neurological disorders for clinical reasoning, diagnosis and management.

3. Course intended learning outcomes (ILOs):

A- Knowledge and understanding

ILOs	Methods of teaching/ learning	Methods of Evaluation
A. Illustrate detailed and updated physiologic principles of the following: - Circulation: * Heart rate. *Blood pressure. - Neuroendocrinology: - Thyroid. - Parathyroid - Adrenal gland. - Pituitary. - Water and electrolyte imbalance.	-Lectures	-Written and oral examination - Log book
 B. Describe in depth Physiologic details of the following: CNS and special senses Autonomic nervous system Nerve and muscle. * Blood pressure * CSF * Blood brain barrier (BBB) 	-Lectures -Tutorial - Didactics	-Written and oral examination - Log book

*Intracranial pressure	
*Cerebral circulation.	
- Physiology of pain and pain theory.	
- Physiology of cognition and memory.	
- Physiology of limbic system.	
- Sleep.	
- speech .	
- Channelopathies.	
- Receptors and transmitters.	

B- Intellectual outcomes

ILOs	Methods of teaching/ learning	Methods of Evaluation
 A. Correlates the facts of Physiology with clinical reasoning, diagnosis and management of common diseases related to Neurological disorders. B. Demonstrate an investigatory and analytic thinking (problem solving) approaches to common clinical situations related to Neurological disorders. 	-Didactic (lectures, seminars, tutorial)	-Written and oral examination -Log book

C- Practical skills

Practical: 0 CP

D-General Skills

Practice-Based Learning and Improvement

ILOs	Methods of teaching/ learning	Methods of Evaluation
A. Use information technology to manage information, access on-line medical information; and support their own education	-Observation and supervision -Written and oral communication	Log book

Interpersonal and Communication Skills

ILOs	Methods of	Methods of
	teaching/	Evaluation
	learning	
B. Write a report in common condition	-Clinical	-Global rating

Course 5, Neuropathology of Neurological disorders. & Genetics of Neurological disorders

- Course title: Neuropathology of Neurological disorders &Genetics of Neurological disorders.
- It is divided into units

Unit 1: Neuropathology of Neurological disorders.

Unit 2: Genetics of Neurological disorders.

Course code: NEU320A#

Course5: module 1; Neuropathology

1. Module data

- Module title: Neuropathology of Neurological disorders.
 - 4 Code:[NEU320A#]
- Speciality : Neurology.
 - ♣ Number of credit points: 2credit point, didactic 2 credit point (100%) and 0 practical..
 - Department (s) delivering the course: Pathology Department in conjunction with Neurology and Psychiatry department
 - Coordinator (s): Staff members of Pathology Department in conjunction with Neurology and Psychiatry department as annually approved by both departments councils.
 - Principle coordinator: Professor.Dr. Eman M Khedr
 Assisstant coordinator: Dr. Ahmed Abdelwarith
 - **♣ Date last reviewed:** 17-9-2017.
 - Requirements (prerequisites) if any: None
 - Fulfilling logbook requirements.

2-Module (unit) Aim

1. The candidate should acquire the detailed neuropathological facts which are appropriate to Neurological diseases and Psychiatric disorders in clinical reasoning, diagnosis and management of Neurological diseases and Psychiatric disorders.

3. Intended learning outcomes (ILOs)

A-Knowledge and understanding

ILOs	Methods of teaching/learning	f Methods of Evaluation
 A. Illustrate principles of General Pathology of the following: cell degeneration inflammation Tuberculosis- Pott's disease. Disturbance of growth Pathology of tumors Diagnostic cytology 	-Lectures Tutorial - Didactics	-Written and oral examination - Log book
B. Describe pathological details of the following: - Ischemic infarction -Hemorrhagic stroke - Aneurysm DementiaNeuropathies↑ICT and brain edemaTumors of CNSAtherosclerosis. Multiple sclerosis, demylinating diseases -Infection of CNSMuscle diseases.		

B-Intellectual outcomes

ILOs	Methods of teaching/ learning	Methods of Evaluation
 A. Correlates the facts of Pathology with clinical reasoning, diagnosis and management of common diseases related to Neurology. B. Demonstrate an investigatory and analytic thinking (problem solving) approaches to common clinical situations related to Neurology. 	-Didactic (lectures, seminars, tutorial)	-Written and oral examination -Log book

C-PRACTICAL skills

Practical: 0 CP

D-General Skills

Practice-Based Learning and Improvement

None

Course 5 Unit (Module) 2 Genetics of Neurological disorders

I. Module data

- Unit Title: Genetics of Neurological disorders
- Course code: NEU320A#
- Speciality is Neurology and Psychiatry
- Number of Credit points(CP): total: 1CP, didactic 1 CP(100%), 0 practical.
- Department (s) delivering the course: Neurology and Psychiatry Department
- Coordinator (s): Staff members of Neurology and Psychiatry Department as annually approved by both departments councils
- **Date last reviewed:** September -2017
- Requirements (prerequisites) none.

2. Unit Aims

 The candidate should acquire the genetic facts of nervous system which are appropriate to Neurological diseases and disorders in clinical reasoning, diagnosis and management of Neurological diseases and disorders.

3. Unit intended learning outcomes (ILOs):

A- Knowledge and understanding

ILOs		Methods of
	teaching/	Evaluation
	learning	_ 2 3.1 3. 3. 3. 3. 3.
A-Illustrate <i>genetic</i> principles of:	-Didactic	- Written and
Basic of cell structures and Molecular genetics:	(lectures,	oral
Nucleus, Mitochondriaetc.	seminars,	examination
Nucleic acids (DNA& RNA).	tutorial)	- Log book
* Patterns of inheritance:	,	o o
- Autosomal dominant inheritance.		
- Autosomal recessive inheritance.		
- X Linked recessive inheritance.		
- X Linked dominant inheritance.		
- Multifactorial inheritance.		
* Chromosomes and Genes.		
* Mitochondria and genes.		
* DNA Analysis.		
* Gene and Mapping.		
*Mechanisms of Mutations.		
*Detections of Mutations.		
*Ethical aspects.		
*Neurogenetic information of the following neurological		
disorders:		
Muscle disorders.		
Peripheral neuropathy.		
Mitochondrial disorders.		
 Neurometabolic disorders, stroke, epilepsy, migraine, 		
Channelopathy, movement disorders, dementia,		
demylinating disease, CNS tumors.		
B-Describe genetic details of the following;		
-Ethical aspects in neurogenetic for investigation and		
counseling.		
- Neurogenetic information of Neurological disorders		
Muscle disorders.		
Peripheral neuropathy.		
Mitochonderial disorder,		
Neurometabolic disorders, stroke, epilepsy,		
migraine, Channelopathy, movement disorders,		
dementia, demylinating disease, CNS tumors.		

B- Intellectual outcomes

ILOs	Methods of teaching/ learning	Methods of Evaluation
A. Apply the basic (genetics) supportive sciences which are appropriate to neurological disorders related problems.	-Didactic (lectures, seminars, tutorial)	-Written and oral examination - Log book

Course Coordinator:	Head of the Department:		
Date:17-9-2017	Date: 17-9-2017		

Second Part

Course 7: Neurology

Name of department: of Neurology and Psychiatry Faculty of medicine Aswan University 2016-2017.

Course 7 Neurology

It is divided into 4 modules:

- Module 1 Neurological disorders.
- Module 2 Neurological emergencies.
- Module 3 Neuroelectrophysiology and neuroimaging.
- Module 4 Interventional Neurology.

1. Course data

- Course Title: Neurology
- Course code: NEU320B
- Department (s) delivering the course: Department of Neurology and Psychiatry – Faculty of Medicine-Aswan University-Egypt.
- Number of credit points: 147 credit point didactic 24 credit point (16.3%) practical 123 credit point (83.7%)
- Coordinator (s):
 - Principle coordinator:

Prof DR.Eman Khedr

- Assistant coordinator (s):
 - Dr. Abeer Abdelhady,
 - Dr. Ahmed Abdelwarith,
 - Dr. Bastawy Elfawal.
 - -Last date reviewed: September -2017.
- Requirements (prerequisites) if any :

> None

+

Requirements from the students to achieve course ILOs are clarified in the joining log book Module Coordinators

Module	Principle coordinator	Assistant coordinators.
Module 1 Neurological disorders.	Prof. Dr.Eman Khedr.	Dr. Abeer Abdelhady Dr. Ahmed Abdelwarith Dr. Bastawy Elfawal Dr. Ahmed Shoeb Dr. Mostafa Saber
Module 2 Neurological emergencies.	Prof.Dr.Eman Khedr	Dr. Bastawy Elfawal
Module 3 Neuroelectrophysiology and neuroimaging.	Prof. Dr. Eman Khedr .	Dr.Mostafa Saber
Module 4 Interventional neurology	Prof. Dr.Ahmed Elbassiouny	Dr.Ahmed Abdelwarith Dr.Ahmed Shoeb

2. Course Aims

2/1.To enable MD students to keep with international standards of neurology patients care by mastering high level of clinical skills, in addition to update medical knowledge as well as clinical experience and competence in the area of neurology medicine and emergencies, diagnostic neuroelectrophysiology and enabling the MD student of making appropriate referrals to a sub-specialist 2/2.Know and critically evaluate and use correct medical information and scientific evidence for patient care and demonstrate the ability to provide patient-centered care that is appropriate, compassionate, and effective for treatment of neurology health problems and the promotion of health.

2/3.To investigates and evaluates the patient care practices, appraise and assimilate scientific evidence, and use these processes to improve patient care.

2/4.Provide assistant lecturers with fundamental knowledge of emergency and stroke intensive care medicine as regards; mastering dealing with critically ill patients, ICU equipments, techniques, indications, contraindications and training skills of different intensive care techniques.

2/5.Identify the indications, complications and likelihood of successful outcome in performing interventional diagnostic and therapeutic tools in neurology.

3. Course intended learning outcomes (ILOs):

Course7: Module (Unit) 1 Neurological Disorders.

A-Knowledge and understanding

ILOs	Methods of teaching/ learning	Methods of Evaluation
A. Explain update and evidence based etiology, clinical picture, diagnosis and management of the following common diseases and clinical conditions: -Cerebrovascular disorders and other vascular disorders. -Central nervous system infection -Paroxysmal disorders (epilepsy- migrainetrigeminal neuroalagia) -Movement disorders. -Tumors in nervous system. -Neuromuscular disorders. -Muscle diseases, -Peripheral neuropathies. -Motor neuron diseasesEdema and hydrocephalous.	learning - Didactic; Lectures Clinical rounds Seminars Clinical rotations (service teaching)	-OSCE at the end of each year -log book & portfolio - One MCQ examination -Written and oral examination
-Traumaspinal cord diseases -Neuroimmunology		
-Child Neurology and developmental disorders.		

-Genetics diseases of the nervous system.		
-Demylinating disorders.		
-Geriatric disorders		
-Headache /pain		
-Neuro-Oncology		
-Sleep disorders		
-Neuroradiology.		
-Critical care neurology		
-Neuroepidemiology of neurological disorders .		
Neurology of systemic diseases.		
-Neurometabolic disorders.		
Systemic diseases and General Medicine.		
Autonomic diseases.		
Environmental neurology.		
Neurotoxicity.		
- Neurological disorders and pregnancy.		
Teratogenicity and neurological diseases.		
- Cerebellar disorders.		
- Channelopathies and Neurological disorders		
B. Describe the principles of updated knowledge	-Didactic	-OSCE at the
of neuroepidemiology and therapeutic trials of	(lectures,	end of each
these conditions mentioned above in A.A.	seminars,	year
- Clinical Approach to the Patient	tutorial)	-log book &
presented with different neurological	-Clinical	portfolio
symptoms and signs.	rounds	- One MCQ
- History case taking (symptoms & signs).	-Seminars	examination
- Management of Neurological disorders	-Clinical	-Written and
in different ages and in pregnancy.	rotations	oral
- pathogenesis, neuromodulation,	-Service	examination
neuroplasticity.	teaching	

C. Illustrate basics of the following rare diseases	-Didactic	-OSCE at the
and conditions including the following:	(lectures,	end of each
 Neurometabolic disorders, 	seminars,	year
- Neurogenetic disorders.	tutorial)	-log book &
- Other types of dementias.	-Clinical	portfolio
- Neurotoxicity	rounds	- One MCQ
 Autoimmune diseases of Nervous 	-Seminars	examination
system.	-Clinical	-Written and
 Complicated cases of conditions mentioned 	rotations	oral
in A.A. or among high risk group.	-Service	examination
D. Explain the facts and principles of the relevant	teaching	
basic supportive sciences related to Neurological		
Disorders.		
E. Explain the facts and principles of the relevant		
clinically supportive sciences related to		
Neurological Disorders.		
F. Describe the basic ethical and medicolegal		
principles revenant to Neurological Disorders.		
G. Describe the basics of quality assurance to		
ensure good clinical care in Neurological		
Disorders.		
H. Explain the ethical and scientific principles of		
medical research.		
I. Explain the impact of common health problems		
in the field of Neurological Disorders on the		
society.		

B-Intellectual outcomes

ILOs	Methods of teaching/ learning	Methods of Evaluation
A. Design and present case in common problem related to Neurological Disorders. B. Apply the basic and clinically supportive sciences which are appropriate to Neurological Disorders.	-Clinical rounds -Senior staff experience	-Procedure and case presentation -Log book & Portfolio
C. Demonstrate an investigatory and analytic thinking "problem – solving "approaches to clinical situation related to Neurological Disorders. D. Plan research projects.		
E. Write scientific papers.		
 F. Lead risk management activities as a part of clinical governs. a. Rehabilitation of related conditions mentioned in A.A. b. Co morbidities in neurological disorders mentioned in A.A. c. Mortality in the wards. G. Plain quality improvement activities in the field of medical education and clinical practice in to Neurological Disorders. H. Create and innovate plans, systems, and other issues for improvement of performance in to Neurological Disorders. 		
in to Neurological Disorders. I. Present and defend his / her data in front of		
a panel of experts		
J. Formulate management plans and alternative decisions in different situations in the field of Neurological Disorders.		

C-Practical skills (Patient Care)

ILOs	Methods of teaching/ learning	Methods of Evaluation
A. Take history, examine and clinically diagnose different conditions related to Neurological Disorders mentioned in A.A.	-Didactic (lectures, seminars, tutorial) -Clinical rounds Clinical rotations (service teaching)	-OSCE -log book & portfolio - One MCQ examination -Clinical exam
 B. Order the following non invasive and invasive diagnostic procedures Routine appropriate Lab investigations related to Neurological disorders. Basic appropriate Lab investigations related to conditions mentioned in A.A. X ray skull, skull base and vertebrae. CT and MRI of the brain and spinal cord. EEG, Evoked potentials. EMG, NCV, F wave and H reflex. CSF examination Sleep analysis. Transcranial magnetic stimulation (rTMS). Intrathecal injection. video monitoring EEG. Transcranial dopplar. CSF Pressure monitoring. Drug monitoring. 	-Clinical round with senior staff -Observation -Post graduate teaching -Hand on workshops -Perform under supervision of senior staff	presentation - Log book - Chick list
 C. Interpret the following non invasive and invasive diagnostic procedures Basic appropriate Lab investigations related to conditions mentioned in A.A. X ray skull, skull base and vertebrae. CT and MRI of the brain and spinal cord. EEG, 	-Clinical round with senior staff -Observation -Post graduate teaching -Hand on workshops	Procedure presentationLog bookChick list

 Evoked potentials. EMG, NCV, F wave and H reflex. CSF examination Sleep analysis. Transcranial magnetic stimulation (rTMS). Intrathecal injection. video monitoring EEG. Transcranial dopplar. CSF Pressure monitoring. Drug monitoring. 	-Perform under supervision of senior staff	
 D. Perform the following non invasive and invasive diagnostic procedures; Basic appropriate Lab investigations related to conditions mentioned in A.A. X ray skull, skull base and vertebrae. CT and MRI of the brain and spinal cord. EEG, Evoked potentials. EMG, NCV, F wave and H reflex. CSF examination Sleep analysis. Transcranial magnetic stimulation (rTMS). Intrathecal injection. video monitoring EEG. Transcranial dopplar. CSF Pressure monitoring. Drug monitoring 	-Clinical round with senior staff -Observation -Post graduate teaching -Hand on workshops -Perform under supervision of senior staff	- Procedure presentation - Log book - Chick list
 E. Prescribe the following non invasive and invasive therapeutic procedures. - Transcranial magnetic stimulation (rTMS) - Intrathecal injection. - transcranial dopplar. - CSF Pressure monitoring 		
 F. Perform the following non invasive and invasive therapeutic procedures - Transcranial magnetic stimulation (rTMS) - Intrathecal injection. 		

G. Develop patient management plans for the problems related to neurological disorders mentioned in A.A.	
H. Develop and carry out patient management plans for related to neurological disorders mentioned in A.A&C	
I. Counsel and educate patients and their family about conditions related to neurological disorders mentioned in A.A.& C (Prognosis, rehabilitation, treatment plan)	
J. Use information technology to support patient care decisions and patient education for the related to neurological disorders mentioned in A.A.	
 K. Provide health care services aimed at preventing the following conditions Delayed diagnosis, complication, recurrence of neurological disorders and drug interaction in conditions mentioned in A.A. 	
L. Work with health care professionals, including those from other disciplines, to provide patient-focused care for the mentioned in A.A and A.C	
M-Write competently all forms of patient charts and sheets including reports evaluating these charts and sheets. (Write and evaluate a consultation note, Inform patients of a diagnosis and therapeutic plan, completing and evaluating comprehensive, timely and legible medical records)	

D-General Skills

Practice-Based Learning and Improvement

ILOs	Methods of teaching/ learning	Methods of Evaluation
A. Perform practice-based improvement activities using a systematic methodology in the common problems (plain and conduct audit cycles) in conditions mentioned in A.A and A.C B. Locate, appraises, and assimilates evidence from scientific studies related to patients' health problems.	-Simulations -Clinical round -Seminars -Lectures -Case presentation -Hand on workshops -Simulations -Clinical round	- Global rating -Procedure & case presentation -Log book & Portfolios - Chick list - Global rating -Procedure & case presentation
	-Seminars -Lectures -Case presentation -Hand on workshops	-Log book & Portfolios - Chick list
C. Apply knowledge of study designs and statistical methods to the appraisal of clinical studies and other information on diagnostic and therapeutic effectiveness		
 D. Use information technology to manage information, access on-line medical information; and support their own education E. Lead the learning of students and other health care professionals. 		

Interpersonal and Communication Skills

ILOs	Methods of teaching/ learning	Methods of Evaluation
F. Create and sustain a therapeutic and ethically sound relationship with patients	-Simulations -Clinical round	- Global rating -Procedure &
G. Perform the following oral communications:	-Seminars	case
 a. Interpretation of the results of different investigations related to Neurological disorders and discussion of different therapeutic options 	-Lectures -Case presentation -Hand on workshops	presentation -Log book & Portfolios - Chick list
H. Fill the following reports:Patients' medical reportsDeath report.		
I. Work effectively with others as a member or leader of a health care team as regard diagnosis and treatment of conditions mentioned in A.A and A.C		

Professionalism

ILOs	Methods of teaching/ Learning	Methods of Evaluation
J. Demonstrate respect, compassion, and integrity; a responsiveness to the needs of patients and society that supersedes self-interest.	ObservationSenior staffexperienceCase taking	-Objective structured clinical examination - Patient
K. Demonstrate a commitment to ethical principles pertaining to provision or withholding of clinical care, confidentiality of patient information, informed consent, and business practices.		survey - 360o global rating
L. Demonstrate sensitivity and responsiveness to patients' culture, age, gender, and disabilities		

Systems-Based Practice

ILOs	Methods of teaching/ learning	Methods of Evaluation
M.Work effectively in different health care delivery settings and systems.	- Observation - Senior staff experience	- 360o global rating
N. Practice cost-effective health care and resource allocation that does not compromise quality of care		- Check list evaluation of live or recorded performance
O. Advocate for quality patient care and assist patients in dealing with system complexities		- 360o global rating- Patient survey
P. Partner with health care managers and health care providers to assess, coordinate, and improve health care and predict how these activities can affect system performance		

Course 7:Module (Unit 2) Neurological Emergencies

A-Knowledge and understanding

ILOs	Methods of teaching/ learning	Methods of Evaluation
A- Explain update and evidence based etiology, clinical picture, diagnosis and management of the of critically ill patients in neurology emergency units including supportive life state, hemodynamic state monitoring, drug monitoring, disability assessment scales, and follow up and therapeutic lines of intervention in the following neurogenic conditions of central and peripheral repiratory distress. i.e. - Stroke (Haemorrhagic and ischemic) - Central and peripheral respiratory distress related to neurogenic condition: - Myathenia gravis - Guillain Barre Syndrome - Myositis. - Periodic muscle paralysis - Status epilepticus & migraineosus - Coma due to different neurological disorders. - Neuroleptic malignant syndrome. - organic brain syndrome.	-Didactic (lectures, seminars, tutorial) -Outpatient -Inpatient -Case presentation -Direct observation	- log book -Objective structure clinical examination (OSCE) One MCQ examination -Written and oral exam
 B. Illustrate updated principles of: -indication of equipment and techniques, used for monitoring of critically ill patients, - Admission & discharge or referral to other centers, in emergency or stroke units - Infection control in ICU. 	-Didactic (lectures, seminars, tutorial) -outpatient -inpatient	- log book -Objective structure clinical examination (OSCE)

- Ethics followed in critical ill patients' management	-case	One MCQ
in emergency units.	presentation	examination
	-Direct	-Written and
	observation	oral exam
C. Outline basics care of the following rare diseases		
and complicated conditions		
- Status epileptic us.		
- Status migraineousus.		
- Mentioned conditions above in high risk group.		
- Autonomic failure.		
- Comorbid multisysten involvement.		
D. Explain the facts and principles of the relevant		
basic supportive sciences related to Neurological		
emergencies.		
E. Explain the facts and principles of the relevant		
clinically supportive sciences related to Neurological		
emergencies.		
F. Describe the basic ethical and medicolegal		
principles revenant to the Neurological		
emergencies.		
G. Describe the basics of quality assurance to		
ensure good clinical care in Neurological		
emergencies.		
H. Explain the ethical and scientific principles of		
medical research.		
I. Explain the impact of common health problems in		
the field of Neurological emergencies.		

B-Intellectual outcomes

ILOs	Methods of teaching/ learning	Methods of Evaluation
 A. Design and present case in common problem related to Neurological emergencies B. Apply the basic and clinically supportive sciences which are appropriate to the Neurological emergencies related problems. C. Demonstrate an investigatory and analytic thinking "problem – solving "approaches to clinical situation related to Neurological emergencies. D. Plan research projects. E. Write scientific papers. F. Lead risk management activities as a part of clinical govern – TreactostomyPeumothorax Ventilator associated pneumonia Cardio respiratory arrest Pulmonary embolism Mortality Intubation Self extubation G. Plain quality improvement activities in the field of medical education and clinical practice in Neurological emergencies H. Create and innovate plans, systems, and other issues for improvement of performance in Neurological emergencies. 	-Clinical rounds -Senior staff experience	-Procedure and case presentation -Log book & Portfolio
 I. Present and defend his / her data in front of a panel of experts J. Formulate management plans and alternative decisions in different situations in the field of Neurological emergencies 		

C-Practical skills (Patient Care)

ILOs	Methods of teaching/ learning	Methods of Evaluation
A. Take history, examine and clinically diagnose different conditions related to Neurological emergencies	Lecture - Seminar - Outpatient -Inpatient -Case presentation -Direct observation	-OSCE -log book & portfolio - One MCQ -Clinical exam
 B. Order the following non invasive and invasive diagnostic procedures; Blood gases and its disturbances — Disability evaluation :GCS, NIHSS,SSS, etc Haemodynamic Monitoring. Respiratory monitoring. Venous cannula . Syring pump adjustment. CVP . Intubations. ventilator adjustment. CSF Pressure monitoring. 	-Clinical round with senior staff -Observation -Post graduate teaching -Hand on workshops -Perform under supervision of senior staff	- Procedure presentation - Log book - Chick list
 C. Interpret the following non invasive and invasive diagnostic procedures; ABG sampling Haemodynamic Monitoring CSF Pressure monitoring 	-Clinical round with senior staff -Observation -Post graduate teaching -Hand on workshops	Procedure presentationLog bookChick list

	-Perform under supervision of senior staff	
 D. Perform the following non invasive/invasive diagnostic procedures The procedures mentioned in C.B 	-Clinical round with senior staff -Observation -Post graduate teaching -Hand on workshops -Perform under supervision of senior staff	Procedure presentationLog bookChick list
E. Prescribe the following non invasive and	-Clinical	- Procedure
invasive therapeutic procedures.	round with	presentation
-Blood gases and its disturbances –	senior staff -Observation	- Log book - Chick list
-Disability evaluation :GCS, NIHSS,SSS, etc	-Post	
- Haemodynamic Monitoring.	graduate	
- Respiratory monitoring.	teaching	
- Venous cannula .	-Hand on	
- Syring pump adjustment.	workshops	
- CVP .	-Perform	
- Intubations.	under	
- ventilator adjustment.	supervision of	
- CSF Pressure monitoring.	senior staff	
F. Perform the following non invasive and	-Clinical	- Procedure
invasive therapeutic procedures	round with	presentation
- Syring pump adjustment.	senior staff	- Log book
- CVP .	-Observation	- Chick list
- Intubations.	-Post	

 ventilator adjustmentWeaning from mechanical ventilation Resuscitation 	graduate teaching -Hand on workshops -Perform under supervision of senior staff	
 G. Develop patient management plans for the following problems Diseases mentioned in A.A and A.C in module 2 	-Clinical round with senior staff	
 H. Develop and carry out patient management plans for the following problems. Conditions mentioned in A.A&C Discharged patients from ICU Previously intubated 	-Clinical round with senior staff	
 I. Counsel and educate patients and their family about; Symptoms of critical illness Methods of management Complications & prognosis of critically ill patients. 	-Clinical round with senior staff	
J. Use information technology to support patient care decisions and patient education for the neurological emergencies related conditions.	-Clinical round with senior staff	
 K. Provide health care services aimed at preventing the following conditions Hospital acquired pneumonia Ventilator associated respiratory tract infection Healthcare associated pneumonia 	-Clinical round with senior staff	

 Septicemia. Bed sores. Deformities. Deep venous thrombosis. 		
 L. Work with health care professionals, including those from other disciplines, to provide patient-focused care for the following Suctioning Tracheotomy tube care Disinfection Caring wounds. Bed sore. Respiratory exercise 	-Clinical round with senior staff	
M.Write competently all forms of patient charts and sheets including reports evaluating these charts and sheets. (Write and evaluate a consultation note, Inform patients of a diagnosis and therapeutic plan, completing and evaluating comprehensive, timely and legible medical records)		

D-General Skills

Practice-Based Learning and Improvement

ILOs	Methods of teaching/ learning	Methods of Evaluation
 A. Perform practice-based improvement activities using a systematic methodology in the common problems (plain and conduct audit cycles) in the following problems: patient care for mentioned conditions in A.A&C 	-Simulations -Clinical round -Seminars -Lectures -Case presentation -Hand on workshops	- Global rating -Procedure & case presentation -Log book & Portfolios - Chick list
 B. Locate, appraises, and assimilates evidence from scientific studies related to patients' health problems. Endotracheal tube obstruction Life threatening bronchospasm Barotrauma Arrhythmias. Drug interactions. Autonomic disturbance. Cardiac insult. Drug reaction. 	-Simulations -Clinical round -Seminars -Lectures -Case presentation -Hand on workshops	- Global rating -Procedure & case presentation -Log book & Portfolios - Chick list
C. Apply knowledge of study designs and statistical methods to the appraisal of clinical studies and other information on diagnostic and therapeutic effectiveness		
D. Use information technology to manage information, access on-line medical information; and support their own education		
E. Lead the learning of students and other health care professionals. Different maneuvers in stroke unit Settings of ventilator		

Interpersonal and Communication Skills

ILOs	Methods of teaching/ learning	Methods of Evaluation
 F. Create and sustain a therapeutic and ethically sound relationship with patients G. Perform the following oral communications: a. Advise patient for synchrony b. Deal with patient relatives c. Ordering residents d. Ordering nurses H. Fill the following reports: Patients' medical reports Patient chart. Death report. 	-Simulations -Clinical round -Seminars -Lectures -Case presentation -Hand on workshops	- Global rating -Procedure & case presentation -Log book & Portfolios - Chick list
 I. Work effectively with others as a member or leader of a health care team A member of a health care team in Neurological Emergencies. A leader of a health care team in night shift 		

Professionalism

ILOs	Methods of teaching/ Learning	Methods of Evaluation
 J. Demonstrate respect, compassion, and integrity; a responsiveness to the needs of patients and society that supersedes self-interest. K. Demonstrate a commitment to ethical principles pertaining to provision or withholding of clinical care, confidentiality of patient information, informed consent, and business practices. 	- Observation - Senior staff experience - Case taking	-Objective structured clinical examination - Patient survey - 3600 global rating
L. Demonstrate sensitivity and responsiveness to patients' culture, age, gender, and disabilities		

Systems-Based Practice

Systems Based Fractice		
ILOs	Methods of	Methods of
	teaching/	Evaluation
	learning	
M.Work effectively in different health care	- Observation	- 360o global
delivery settings and systems.	- Senior staff	rating
N. Practice cost-effective health care and	experience	- Check list
		evaluation of
resource allocation that does not compromise quality of care		live or
,		recorded
O. Advocate for quality patient care and assist		performance
patients in dealing with system complexities		- 360o global
P. Partner with health care managers and health		rating
care providers to assess, coordinate, and		- Patient
improve health care and predict how these		survey
activities can affect system performance		

Course7, Module 3: Neuroelectrophysiology and Neuroimaging

A-Knowledge and understanding

ILOs	Methods of	Methods of
	teaching/	Evaluation
	learning	
A.Explain update and evidence based etiology,	- Didactic	- Log book
clinical picture, diagnosis and management of the	(lectures,	- Objective
following common diseases and clinical conditions	seminars,	structure
related to neuroelectrophysiology and	tutorial)	clinical
neuroimaging studies either for diagnosis or follow	-Outpatient	examination
up including the following aspects(techniques,	-Inpatient	(OSCE)
method of study, circumstances that give	- Case	- MCQ
significant measurable effects on reported	presentation	examination
findings(age, drugs), of the following:	-Direct	-Written and
- Peripheral neuropathy.	observation	oral exam
- Muscle diseases.		
- Neuromuscular disorders.		
- Dementia, delirium,		
- Encephalopathy.		
- Brain tumors.		
-Dissiminated sclerosis.		
- Focal brain lesion.		
- Spinal cord diseases.		
- Radiculopathy.		
- Demylinating diseases.		
B. Describe the principles of	-Didactic	- Log book
-Normal and abnormal findings of	(lectures,	-Objective
neuroelctrophysiology and neuroimaging studies.	seminars,	structure
- Indications and prognostic values and diagnostic	tutorial)	clinical

+		
tools sensitivity of EEG, MCV,SCV,EMG,VEP,	-outpatient	examination
ABR, SSEP, MEP, Videomonitoring EEG, Sleep lab.	-inpatient	(OSCE)
and cortical excitability, Transcallosal inhibition,	-case	One MCQ
silent period.	presentation	examination
- Indications of neuroimaging studies;	-Direct	-Written and
 X ray spine& skull. 	observation	oral exam
CT brain & spine.	_	
 MRI brain& spine. 		
 Trancranial dopplar, 		
CT angiography.		
 MRA, MRV, SPECT, fMRI. 		
C. Outline basics of the following rare diseases and		
<u>conditions</u>		
 Mentioned conditions above combined with 		
other insults (trauma, metabolic disturbance ,		
toxicity)		
D. Explain the facts and principles of the relevant		
basic supportive sciences related to		
neuroelctrophysiology and neuroimaging studies.		
E. Explain the facts and principles of the relevant		
clinically supportive sciences related to		
neuroelctrophysiology and neuroimaging studies.		
F. Describe the basic ethical and medicolegal		
principles revenant to the neuroelctrophysiology		
and neuroimaging studies.		
G. Describe the basics of quality assurance to		
ensure good clinical care in neuroelctrophysiology		
and neuroimaging studies.		
H. Explain the ethical and scientific principles of		
medical research.		
I. Explain the impact of common health problems in		
the field of neuroelctrophysiology and		
neuroimaging studies on the society.		

B-Intellectual outcomes

ILOs	Methods of teaching/	Methods of Evaluation
	learning	
 A. Design and present case in common problem related to neuroelectrophysiology and neuroimaging studies. B. Apply the basic and clinically supportive sciences which are appropriate to the neuroelectrophysiology and neuroimaging studies related problems. C. Demonstrate an investigatory and analytic thinking "problem – solving "approaches to clinical situation related to neuroelectrophysiology and neuroimaging studies D. Plan research projects. E. Write scientific papers. F. Lead risk management activities as a part of clinical governs. 	-Clinical rounds -Senior staff experience	-Procedure and case presentation -Log book & Portfolio.
Vasovagal attack.transmission of infection.		
Neurosis.Somatization.		
G. Plain quality improvement activities in the field of medical education and clinical practice in neuroelectrophysiology and neuroimaging studies.		
 H. Create and innovate plans, systems, and other issues for improvement of performance in neuroelectrophysiology and neuroimaging studies. I. Present and defend his / her data in front of a panel of experts J. Formulate management plans and 		
alternative decisions in different situations in the field of neuroelectrophysiology and neuroimaging studies		

C-Practical skills (Patient Care)

e i ractical skins (i attent care)		
ILOs	Methods of teaching/	Methods of Evaluation
	learning	Evaluation
A. Take history, examine and clinically diagnose different conditions related to neuroelectrophysiology and neuroimaging studies.	-Didactic (lectures, seminars, tutorial) - Outpatient -Inpatient -Case presentation -Direct observation	-OSCE -log book & portfolio - MCQ -Clinical exam
 B. Order the following non invasive and invasive diagnostic procedures EEG, Video monitoring EEG, MCV,SCV,F wave, H Reflex, EMG, MEP,VEP,ABR.SSEP,SEP, Cortical Excitability, TCI, CSP Transcranial dopplar, Sleep lab. Neuroimaging modalities (x ray, CT, MRI, MRA, MRV, Multislice CT) 	-Clinical round with senior staff -Observation -Post graduate teaching -Hand on workshops -Perform under supervision of senior staff	- Procedure presentation - Log book - Chick list - Objective structure clinical examination (OSCE) - OSCE -log book & portfolio - MCQ -Clinical exam
 C. Interpret the following non invasive and invasive diagnostic procedures The procedures mentioned in C.B. 	-Clinical round with senior staff -Observation -Post graduate teaching -Hand on workshops -Perform under supervision of senior staff	 Procedure presentation Log book Chick list Objective structure clinical examination (OSCE)
D. Perform the following non invasive and invasive diagnostic procedures	-Clinical round with senior staff	- Procedure presentation

 EEG, Video monitoring EEG, MCV,SCV,F wave , H Reflex, EMG, MEP,VEP,ABR.SSEP,SEP, Cortical Excitability, TCI, CSP Transcranial dopplar, 	-Observation -Post graduate teaching -Hand on workshops -Perform under supervision of senior staff	 Log book Chick list Objective structure clinical examination (OSCE) MCQ
E. Prescribe the following non invasive and invasive therapeutic procedures.rTMS.	-Clinical round with senior staff -Observation -Post graduate	
F. Perform the following non invasive and invasive therapeutic proceduresrTMS	teaching -Hand on workshops -Perform under supervision of senior staff	
 G. Develop and carry out patient management plans for the following problems; Related to neuroelectrophysiology and neuroimaging studies. 	-Clinical round with senior staff	
 H. Counsel and educate patients and their family about; Prognosis of diagnosed condition related to neuroelectrophysiology and neuroimaging studies. 	- Clinical round with senior staff -Perform under supervision of senior staff	
I. Use information technology to support patient care decisions and patient education for the neuroelectrophysiology and neuroimaging studies related conditions.	-Clinical round with senior staff	

J. Provide health care services aimed at preventing the following conditions the delayed diagnosis and subsequent complications of related conditions mentioned in AA	-Clinical round with senior staff	
 K. Work with health care professionals, including those from other disciplines, to provide patient-focused care for the following Cardiac diseases Medicolegal assessments. Rehabilitation 	-Clinical round with senior staff	
L. Write competently all forms of patient charts and sheets including reports evaluating these charts and sheets.(Write and evaluate a consultation note, Inform patients of a diagnosis and therapeutic plan, completing and evaluating comprehensive, timely and legible medical records)		

D-General Skills

Practice-Based Learning and Improvement

ILOs	Methods of teaching/ learning	Methods of Evaluation
 A. Perform practice-based improvement activities using a systematic methodology in the common problems (plain and conduct audit cycles) Guidelines for procedures Interpretation of findings 	-Simulations -Clinical round -Seminars -Lectures -Case presentation -Hand on workshops	 Global rating Procedure & case presentation Log book & Portfolios Chick list
 B. Locate, appraises, and assimilates evidence from scientific studies related to patients' health problems. Articles about topics mentioned in A.A 	-Simulations -Clinical round -Seminars -Lectures -Case presentation -Hand on workshops	- Global rating -Procedure & case presentation -Log book &
C. Apply knowledge of study designs and statistical methods to the appraisal of clinical studies and other information on diagnostic and therapeutic effectiveness		- Chick list
D. Use information technology to manage information, access on-line medical information; and support their own education		
E. Lead the learning of students and other health care professionals in Neuroelectrophysiology		

Interpersonal and Communication Skills

ILOs	Methods of teaching/ learning	Methods of Evaluation	
 F. Create and sustain a therapeutic and ethically sound relationship with patients G. Perform the following oral communications: Interpretation of result of the neuroelectrophysiology and neuroimaging studies. 	-Simulations -Clinical round -Seminars -Lectures -Case	-Clinical rati round -Pro -Seminars case -Lectures pre -Case -Log	- Global rating -Procedure & case presentation -Log book &
 H. Fill the following reports: NEUROELECTROPGYSIOLOGY REPORT. Transcranial Dopplar Video monitoring EEG Final comment on the results of the neuroelectrophysiology studies. 	presentation -Hand on workshops	Portfolios - Chick list	
I. Work effectively with others as a member or leader of a health care team			
 A member of a health care team in Neuroelectrophysiology studies A leader of a health care team in Transcranial dopplar. 			

Professionalism

ILOs	Methods of teaching/ Learning	Methods of Evaluation
J. Demonstrate respect, compassion, and integrity; a responsiveness to the needs of patients and society that supersedes self-interest.	- Observation - Senior staff experience - Case taking	-Objective structured clinical examination - Patient
K. Demonstrate a commitment to ethical principles pertaining to provision or withholding of clinical care, confidentiality of patient information, informed consent, and business practices.		survey - 360o global rating
L. Demonstrate sensitivity and responsiveness to patients' culture, age, gender, and disabilities		

Systems-Based Practice

ILOs	Methods of	Methods of
	teaching/	Evaluation
	learning	
 M.Work effectively in different health care delivery settings and systems. N. Practice cost-effective health care and resource allocation that does not compromise quality of care 	- Observation - Senior staff experience	- 360o global rating- Check list evaluation of live or recorded
O. Advocate for quality patient care and assist patients in dealing with system complexities P. Partner with health care managers and health care providers to assess, coordinate, and improve health care and predict how these activities can affect system performance		performance - 360o global rating - Patient survey

Course 7; Module 4: Interventional Neurology

A-Knowledge and understanding

ILOs	Methods of teaching/	Methods of Evaluation
A-Explain update and evidence based etiology, clinical picture, diagnosis and management of the following common diseases and clinical conditions related to interventional neurology either for diagnosis, treatment or follow up including the following aspects(techniques, method of study, circumstances that give significant measurable effects on reported findings(age, drugs),of the following conditions: - stroke Peripheral neuropathy Muscle diseases Neuromuscular disorders Dementia, delirium, - Encephalopathy Brain tumors Dissiminated sclerosis Focal brain lesion Spinal cord diseases Radiculopathy Demylinating diseases.	-Didactic (lectures, seminars, tutorial) -Outpatient -Inpatient -Case presentation -Direct observation	- Log book - Objective structure clinical examination (OSCE) - One MCQ examination at the second half of the second year -Written and oral exam
B. Mention the principles of Indications of Diagnostic Indications and	-Didactic (lectures,	- Log book -Objective

prognostic values and diagnostic tools and	seminars,	structure
therapeutic intervention of :	tutorial)	clinical
- rTMS	-Outpatient	examination
- Deep brain stimulation.	-Inpatient	(OSCE)
 Intrathecal injections 	-Case	- MCQ
 Neuroplasticity &neurorepair, 	presentation	examination
- Indications of interventional	-Direct	-Written and
neuroimaging studies;	observation	oral exam
- Muscle & nerve biopsy.		
In epilepsy , stroke, cognitive function, brain		
tumors, degenerative diseases.		
C. Mention basics of the following rare or	-Didactic	- Log book
degenerative diseases and conditions related	(lectures,	-Objective
to interventional Neurology (Neurorepair and	seminars,	structure
stem cells, Nerve , muscle, brain)	tutorial)	clinical
- Other tools for stroke rather than thrombolytic	-Outpatient	examination
therapy.	-Inpatient	(OSCE)
	-Case	- MCQ
	presentation	examination
	-Direct	-Written and
	observation	oral exam
D. Explain the facts and principles of the relevant	-Didactic	- Log book
basic supportive sciences related to Diagnostic	(lectures,	-Objective
& Interventional Neurology.	seminars,	structure
	tutorial)	clinical
	-Outpatient	examination
	-Inpatient	(OSCE)
	-Case	- MCQ
	presentation	examination
	-Direct	-Written and
	observation	oral exam
E. Explain the facts and principles of the relevant	-Didactic	- Log book
clinically supportive sciences related to	(lectures,	-Objective
Diagnostic & Interventional Neurology	seminars,	structure
	tutorial)	clinical

F. Describe the basic ethical and medico legal principles revenant to the Diagnostic & Interventional Neurology.	-Outpatient -Inpatient -Case presentation -Direct observation -Didactic (lectures, seminars, tutorial) -Outpatient -Inpatient -Case presentation -Direct observation	examination (OSCE) - MCQ examination -Written and oral exam - Log book -Objective structure clinical examination (OSCE) - MCQ examination -Written and oral exam
G. Describe the basics of quality assurance to ensure good clinical care in Diagnostic &	-Didactic (lectures,	- Log book -Objective
therapeutic Interventional Neurology. H. Explain the ethical and scientific principles of	seminars, tutorial)	structure clinical
medical research.	-Outpatient	examination
I. Explain the impact of common health	-Inpatient	(OSCE)
problems in the field of Diagnostic &	-Case	- MCQ
therapeutic Interventional Neurology on the	presentation	examination
society.	-Direct	-Written and
	observation	oral exam

B-Intellectual outcomes

ILOs	Methods of teaching/ learning	Methods of Evaluation
 A. Design and present case in common problem related to Diagnostic & Interventional therapeutic Interventional Neurology. B. Apply the basic and clinically supportive sciences which are appropriate to Neurological Disorders related problems. 	-Clinical rounds -Senior staff experience	-Procedure and case presentation -Log book & Portfolio
 C. Demonstrate an investigatory and analytic thinking "problem – solving "approaches to clinical situation related to Diagnostic & therapeutic Interventional Neurology. D. Plan research projects. E. Write scientific papers. F. Lead risk management activities as a part of clinical governs. latrogenic bleeding or ischemia. Carotid showering Cardio respiratory arrest Cross CNS infection. 		
G. Plain quality improvement activities in the field of medical education and clinical practice in Diagnostic & therapeutic Interventional Neurology		
H. Create and innovate plans, systems, and other issues for improvement of performance in Diagnostic & therapeutic Interventional Neurology		
 I. Present and defend his / her data in front of a panel of experts J. Formulate management plans and alternative decisions in different situations in the field of Diagnostic & therapeutic 		
Interventional Neurology.		

C-Practical skills (Patient Care)

ILOs	Methods of	Methods of
	teaching/	Evaluation
	learning	
A. Take history, examine and clinically diagnose	-Didactic	-OSCE
different conditions related to Diagnostic &	(lectures,	-log book &
therapeutic Interventional Neurology	seminars,	portfolio
merapeutic interventional neurology	tutorial)	- MCQ
	- Outpatient	examination
	-Inpatient	-Clinical exam
	Case	Cimical Chairi
	presentation	
	-Direct	
	observation	
P. Order the following non-investive and	-Lecture	- Procedure
B. Order the following non invasive and	- Seminar	presentation
invasive diagnostic procedures	-Outpatient	- Log book
Diagnostic procedures	-Inpatient	- Chick list
 rTMS as diagnostic and therapeutic tool. 	-Case	- Objective
. Sleep lab	presentation	structure
CSF aspiration.	-Direct	clinical
Intrathecal injection.	observation	examination
 Different neuroimaging modalities. 	Observation	
Different fledronflaging fliodanties.		(OSCE)
		- MCQ
		examination
C. Interpret the following non invasive and	-Didactic	- Procedure
invasive diagnostic procedures	(lectures,	presentation
Mentioned in C.B.	seminars,	- Log book
	tutorial)	- Chick list
	-outpatient	- Objective
	-inpatient	structure
	-case	clinical
	presentation	examination
	-Direct	(OSCE)
	observation	- MCQ
	5,550, 740,511	= =

 D. Perform the following non invasive diagnostic procedures rTMS Transcranial dopplar 	-Clinical round with senior staff -Observation -Post graduate teaching -Hand on workshops -Perform under supervision of senior staff	- Procedure presentation - Log book - Chick list - Objective structure clinical examination (OSCE) - MCQ
 E. Prescribe the following non invasive and invasive therapeutic procedures. For all procedures mentioned above in CB 	-Didactic (lectures, seminars, tutorial) -Outpatient -Inpatient -Case presentation -Direct observation	- Procedure presentation - Log book - Chick list
F. Perform the following non invasive therapeutic proceduresrTMS		
G. Develop and carry out patient management plans for the mentioned problems related to interventional Neurology in AA& CB.	-Clinical round with senior staff	
H. Counsel and educate patients and their family about conditions mentioned in A.A.	- Clinical round with senior staff -Perform under	

	supervision of senior staff
I. Use information technology to support patient care decisions and patient education for the Interventional Neurology related conditions.	-Clinical round with senior staff
J. Provide health care services aimed at preventing the complication of conditions Related to interventional Neurology.	-Clinical round with senior staff
K. Work with health care professionals, including those from other disciplines, to provide patient-focused patient care for related conditions mentioned A.A.	-Clinical round with senior staff
L. Write competently all forms of patient charts and sheets including reports evaluating these charts and sheets. (Write and evaluate a consultation note, Inform patients of a diagnosis and therapeutic plan, completing and evaluating comprehensive, timely and legible medical records).	

D-General Skills

Practice-Based Learning and Improvement

ILOs	Methods of teaching/ learning	Methods of Evaluation
 A. Perform practice-based improvement activities using a systematic methodology in the common problems (plain and conduct audit cycles) Multimodality approach for management of mentioned conditions A.A. 	-Simulations -Clinical round -Seminars -Lectures -Case presentation -Hand on workshops	- Global rating -Procedure & case presentation -Log book & Portfolios - Chick list
 B. Locate, appraises, and assimilates evidence from scientific studies related to patients' health problems. Articles about diagnostic & interventional Neurology. 	-Simulations -Clinical round -Seminars -Lectures -Case	Global ratingProcedure &case presentationLog book &Portfolios
C. Apply knowledge of study designs and statistical methods to the appraisal of clinical studies and other information on diagnostic and therapeutic effectiveness	presentation -Hand on workshops	- Chick list
D. Use information technology to manage information, access on-line medical information; and support their own education		
E. Lead the learning of students and other health care professionals in interventional Neurology.		

Interpersonal and Communication Skills

ILOs	Methods of teaching/ learning	Methods of Evaluation
F. Create and sustain a therapeutic and ethically sound relationship with patients	-Simulations -Clinical	- Global rating
G. Perform the following oral communications:e. Interpretation of rTMS mechanism for diagnosis and therapy.	round -Seminars -Lectures -Case	-Procedure & case presentation -Log book &
H. Fill the following reports:Medical report.	presentation -Hand on	Portfolios - Chick list
I. Work effectively with others as a member or leader of a health care team:	workshops	
➤ A member of a health care team in diagnostic & therapeutic Interventional neurology		

Professionalism

ILOs	Methods of teaching/ Learning	Methods of Evaluation
 J. Demonstrate respect, compassion, and integrity; a responsiveness to the needs of patients and society that supersedes self-interest. K. Demonstrate a commitment to ethical principles pertaining to provision or withholding of clinical care, confidentiality of patient information, informed consent, and business practices. 	- Observation - Senior staff experience - Case taking	-Objective structured clinical examination - Patient survey - 3600 global rating
L. Demonstrate sensitivity and responsiveness to patients' culture, age, gender, and disabilities		

Systems-Based Practice

ILOs	Methods of teaching/ learning	Methods of Evaluation
M.Work effectively in different health care delivery settings and systems.	ObservationSenior staff experience	- 360o global rating
N. Practice cost-effective health care and resource allocation that does not compromise quality of care.	- Observation -Senior staff experience	- Check list evaluation of live or
O. Advocate for quality patient care and assist patients in dealing with system complexities.		recorded performance - 360o global
P. Partner with health care managers and health care providers to assess, coordinate, and improve health care and predict how these activities can affect system performance		rating - Patient survey

4. Course contents (topic s/modules/rotation Course Matrix

Time Schedule: Second Part

Topic	Covered ILOs				
	Knowledge	Intellectual	Practical skill	General Skills	
	Α	В	С	D	
Module 1	Neurological I	Disorders		-	
Cerebrovascular disorders and other vascular disorders.	A,C-I	A-J	A-M	A-K	
-Central nervous system infection.	A,C-I	A-J	A-K	A-H	
Paroxysmal disorders (epilepsy- migraine- trigeminal neuroalagia)	A,C-I	A-J	A-M	A-K	
Movement disorders.	A,C-I	A-J	A-D	A-H	
Tumors in nervous system.	A,C-I	A-J	A-C	A-H	
Neuromuscular disorders.	A,C-I	A-J	A-F	A-J	
Muscle diseases	A,C-I	A-J	A-C	A-J	
Peripheral neuropathies.	A,C-I	A-J	A-C,F	A-J	
Motor neuron diseases.	A,C-I	A-J	A-E	A-J	
Edema and hydrocephalous.	A,C-I	A-J	A-C	A-F	
Trauma.	A,C-I	A-J	A-C	A-E	
Teratogencity & Neurological disorders	A,C-I	A-J	A,B	A-E	
spinal cord diseases	A,C-I	A-J	A-F	A-E	
Channelopathies and Neuroimmunology	A,C-I	A-J	А	A-E

5. Course Methods of teaching/learning:

- 1. Didactic (lectures, seminars, tutorial)
- 2. Outpatient
- 3. Inpatient
- 4. Clinical rounds
- 5. Clinical rotations
- 6. Service teaching
- 7. Direct observation
- 8. Post graduate teaching
- 9. Hand on workshops
- 10. Perform under supervision of senior staff
- 11. Simulations
- 12. Present a case (true or simulated) in a grand round
- 13. Case Taking
- 14. journal club,
- 15. Critically appraised topic,
- 16. Educational prescription
- 17. Observation & supervision
- 18. Written & oral communications

6. Course Methods of teaching/learning: for students with poor achievements

- Extra Didactic (lectures, seminars, tutorial) according to their needs
- 2. Extra training according to their needs

7. Course assessment methods:

i. Assessment tools:

- Clinical examination
- Written
- Oral examination
- Chick list
- ➤ log book & portfolio

- Procedure/case presentation
- > MCQ
- ➤ Objective structured clinical examination
- Check list evaluation of live or recorded performance
- Record review (report)
- Patient survey
- ➤ 360o global rating
- ii. Time schedule: At the end of the second part
- iii. Marks: 1200

ANNEX 2 Program Academic Reference Standards (ARS)

1- Graduate attributes for medical doctorate in Neurology

The Graduate (after residence training and medical doctorate years of study) must:

- **1-** Demonstrate competency and mastery of basics, methods and tools of scientific research and clinical audit in the chosen field of neurology.
 - **2-** Have continuous ability to add knowledge to the *Neurology*through research and publication.
- **3-** Appraise and utilise relevant scientific knowledge to continuously update and improve clinical practice.
- **4-** Acquire excellent level of medical knowledge in the basic biomedical, behavioural and clinical sciences, medical ethics and medical jurisprudence and apply such knowledge in patient care and scientific research.
- **5-** Function as a leader of a team to provide patient care that is appropriate, effective and compassionate for dealing with health problems and health promotion.
- **6-** Identify and create solutions for health problems in his Speciality.
- **7-** Acquire an in depth understanding of common areas of *Neurology*
- , from basic clinical care to evidence based clinical application, and possession of required skills to manage independently all problems in these areas.
- 8- Demonstrate leadership competencies including interpersonal and communication skills that ensure effective information exchange with individual patients and their families and teamwork with other health professions, the scientific community and the public.

- **9-** Function as teacher in relation to colleagues, medical students and other health professions.
- **10**-Master decision making capabilities in different situations related to his field of practice.
- 11- Show leadership responsiveness to the larger context of the health care system, including e.g. the organisation of health care, partnership with health care providers and managers, practice of cost-effective health care, health economics, and resource allocations.
- **12-** Demonstrate in depth awareness of public health and health policy issues including independent ability to improve health care, and identify and carryout systembased improvement of care.
- **13-** Show model attitudes and professionalism.
- **14-** Demonstrate commitment for lifelong learning and maintenance of competence and ability for continuous medical education and learning in subsequent stages and in the neurology or one of its subspecialties.
- **15** Use recent technologies to improve his practice in the neurology field.
- **16-** Share in updating and improving clinical practice in the neurology field.

2- Competency based Standards for medical doctorate

2.1- Knowledge and understanding

By the end of the program, the graduate should demonstrate satisfactory knowledge and understanding of

2-1-A- Established, updated and evidence- based theories, basics and developments of *Neurology*

and relevant sciences.

- 2-1-B- Basics, methods and ethics of medical research.
- 2-1-C- Ethical and medicologal principles of medical practice related to *Neurology* field.
- 2-1-D- Principles and measurements of quality in the *Neurology* field.
 - 2-1-E- Principles and efforts for maintainace and improvements of public health.

2- Intellectual skills

By the end of the program, the graduate should be able to demonstrate the following

- **2-2-A-** Application of basic and other relevant science to solve speciality related Problems.
- 2-2-B- Problem solving based on available data.
- 2-2-C- Involvement in research studies related to the neurology.
- 2-2-D- Writing scientific papers.
- **2-2-E-** Risk evaluation in the related clinical practice.
- **2-2-F-** Planning for performance improvement in the neurology field.
- **2-2-G-** Creation and innovation in the neurology field.
- **2-2-H-** Evidence based discussion.
- **2-2-I-** Decision making in different situations related to the neurology fields.

2.3- Clinical skills

By the end of the program, the graduate should be able to Competency-based outcomes for Patient Care:-

- 2-3-A- MD students must be able to provide extensive level of patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health extensive level means in depth understanding and from basic science to evidence based clinical application and possession of skills to manage independently all problems in his field of practice.
- **2-3-B-** Master patient care skills relevant to that Neurology speciality for patients with all diagnoses and procedures.
- **2-3-C-** Write and evaluate reports for situations related to the field of Neurology speciality.

2.4- General skills

By the end of the program, the graduate should be able to Competency-based outcomes for Practice-based Learning and Improvement

- **2-4-A-**Master practice-based learning and improvement skills that involves investigation and evaluation of their own patient care, appraisal and assimilation of scientific evidence, improvements in patient care and risk management
- **2-4-B-** Use competently all information sources and technology to improve his practice.
- 2-4-C- Master skills of teaching and evaluating others.
 - Competency-based objectives for Interpersonal and Communication Skills
- **2-4-D-**Master interpersonal and communication skills that result in effective information exchange and teaming with patients, their families, and other health professionals.

4 Competency-based objectives for Professionalism

- **2-4-E-**Master Professionalism behavior, as manifested through a commitment to carrying out professional responsibilities, adherence to ethical principles, and sensitivity to a diverse patient population.
 - Competency-based objectives for Systems-based Practice:
- **2-4-F-**Demonstrate an awareness of and responsiveness to the larger context and system of health care and the ability to effectively use system resources to provide care that is of optimal value.
- **2-4-G-** Participate in improvement of the education system.
- **2-4-H-** Demonstrate skills of leading scientific meetings including time management
- **2-4-O-** Demonstrate skills of self and continuous learning.

Annex 3, Methods of teaching/learning

Annex 3, Methods of teaching/learning

	Patient care	Medical knowledge		and communication	Professionalism	Systems- based practice
Didactic (lectures, seminars, tutorial)	Х	X		X	Х	Х
journal club,	Х	Х	Х			
Educational prescription	Х	Х	Х	Х	Х	Х
Present a case (true or simulated) in a grand round		Х	Х	Х	Х	
Observation and supervision	Х		Х	Х	Х	Х
conferences		Х	Х	Х		Х
Written assignments	Х	Х	Х	X	Х	Х
Oral assignments	Х	Х	Х	X	Х	Х

Teaching methods for knowledge

- Didactic (lectures, seminars, tutorial)
- ❖ journal club
- Critically appraised topic
- ❖ Educational prescription (a structured technique for following up on clinical questions that arise during rounds and other venues).
- Present a case (true or simulated) in a grand round
- Others

Teaching methods for patient care

- Observation and supervision /Completed tasks procedure/case logs
- On-the-job" training without structured teaching is not sufficient for this skill (checklists).
- Simulation is increasingly used as an effective method for skill/teamwork training.

Teaching methods for other skills

- Written communication (e.g., orders, progress note, transfer note, discharge summary, operative reports, and diagnostic reports).
- Oral communication (e.g., presentations, transfer of care, interactions with patients, families, colleagues, members of the health care team) and/or non verbal skills (e.g., listening, team skills)
- ❖ Professionalism, including medical ethics, may be included as a theme throughout the program curriculum that includes both didactic and experiential components (e.g., may be integrated into already existing small group discussions of vignettes or case studies and role plays, computer-based modules) and may be modeled by the faculty in clinical practice and discussed with the resident as issues arise during their clinical practice.

Annex 4, Assessment methods

Annex 4, ILOs evaluation methods for MD students.

	Practic al skills	К	Intellect ual	General skills

OSCE	Х	Х	Х	Х	Х	Х	Х

Annex 4, Glossary of MD students assessment methods

- Record Review Abstraction of information from patient records, such as medications or tests ordered and comparison of findings against accepted patient care standards.
- Chart Stimulated Recall Uses the MD doctor's patient records in an oral examination to assess clinical decision-making.
- Mini clinical evaluation: Evaluation of Live/Recorded Performance (single event) – A single resident interaction with a patient is evaluated using a checklist. The encounter may be videotaped for later evaluation.
- Standardized Patients (SP) Simulated patients are trained to respond in a manner similar to real patients. The standardized patient can be trained to rate MD doctor's performance on checklists and provide feedback for history taking, physical examination, and communication skills. Physicians may also rate the MD doctor's performance.
- Objective Structured Clinical Examination (OSCE) A series of stations with standardized tasks for the MD doctors to perform. Standardized patients and other assessment methods often are combined in an OSCE. An observer or the standardized patient may evaluate the MD doctors.
- ❖ Procedure or Case Logs MD doctors prepare summaries of clinical experiences including clinical data. Logs are useful to document educational experiences and deficiencies.
- PSQs Patients fill out Patient Survey questionnaires (PSQs) evaluating the quality of care provided by MD doctors.
- Case /problems assess use of knowledge in diagnosing or treating patients or evaluate procedural skills.

- Models: are simulations using mannequins or various anatomic structures to assess procedural skills and interpret clinical findings. Both are useful to assess practice performance and provide constructive feedback.
- ❖ 360 Global Rating Evaluations MD doctors, faculty, nurses, clerks, and other clinical staff evaluate MD doctors from different perspectives using similar rating forms.
- ❖ Portfolios A portfolio is a set of project reports that are prepared by the MD doctors to document projects completed during the MD study years. For each type of project standards of performance are set. Example projects are summarizing the research literature for selecting a treatment option, implementing a quality improvement program, revising a medical student clerkship elective, and creating a computer program to track patient care and outcomes.
- ❖ Examination MCQ A standardized examination using multiplechoice questions (MCQ). The in-training examination and written board examinations are examples.
- Examination Oral Uses structured realistic cases and patient case protocols in an oral examination to assess clinical decision-making.
- Procedure or Case Logs MD doctors prepare summaries of clinical experiences including clinical data. Logs are useful to document educational experiences and deficiencies.
- PSQs Patients fill out Patient Survey questionnaires (PSQs) evaluating the quality of care provided by MD doctors.

Annex 6, program Correlations:

مصفوفة توافق المعايير القومية القياسية العامة لبرامج الدكتوراه مع المعايير الأكاديمية المعتمدة من كلية الطب – جامعة أسوان لدرجة الدكتوراه في الأمراض العصبية

1-

I- General Academic Reference Standards (GARS) versus Program ARS

Graduate attributes

Faculty ARS	NAQAAE General ARS for postgraduate Programs
1- Demonstrate competency and mastery of basics, methods and tools of scientific research and clinical audit in Neurology.	1 ابتقان أساسيات و منهجيات البحث العلمي
2- Have continuous ability to add knowledge new developments to Neurology through research and publication.	2-العمل المستمر علي الإضافة للمعارف في مجال التخصص
3- Appraise and utilise scientific knowledge to continuously update and improve clinical practice and relevant basic sciences.	3-تطبيق المنهج التحليلي والناقد للمعارف في مجال التخصص و المجالات ذات العلاقة
4- Acquire excellent level of medical knowledge in the basic biomedical, clinical, behavioural and clinical sciences, medical ethics and medical jurisprudence and apply such knowledge in patient care and scientific	4_دمج المعارف المتخصصة مع المعارف ذات العلاقة مستنبطا و مطورا للعلاقات البينية بينها 4 المتخصصة مع المعارف ذات العلاقة مستنطا و مطورا للعلاقات
 5- Function as a leader of a team to provide patient care that is appropriate, compassionate for dealing with effective and health Problems and health promotion. 7- Acquire an in depth understanding of common areas of speciality, from basic clinical care to evidence based clinical application, and possession of skills to manage independently 	5-الطهاية ويعها عميقا بالمشاكل الجارية و النظريات الحديثة في مجال التخصص
all problems in these areas. 6- Identify and create solutions for health problems in Neurology.	6-تحديد المشكلات المهنية و إيجاد حلولا مبتكرة لحلها

 5- Function as a leader of a team to provide patient care that is appropriate, effective and compassionate for dealing with health problems and health promotion. 7- Acquire an in depth understanding of common areas of Neurology, from basic clinical care to evidence based clinical application, and possession of skills to manage independently all problems in these areas. 	7-إتقان نطاقا واسعا من المهارات المهنية في مجال التخصص
16- Share in updating and improving clinical practice in Neurology.9- Function as teacher in relation to colleagues, medical students and other health professions.	8- التوجه نحو تطوير طرق و أدوات و أساليب جديدة للمزاولة المهنية
15- Use recent technologies to improve his practice in Neurology.	9-استخدام الوسائل التكنولوجية المناسبة
 8- Demonstrate leadership competencies including interpersonal and communication skills that ensure effective information exchange with individual patients and their families and teamwork with other health professions, the scientific community and the public. 5- Function as a leader of a team to provide patient care that is appropriate, effective and compassionate for dealing with health problems and health promotion. 	10-التواصل بفاعلية و قيادة فريق عمل في سياقات مهنية مختلفة
10- Master decision making capabilities in different situations related to Neurology.	11 اتخاذ القرار في ظل المعلومات المتاحة
11- Show leadership responsiveness to the larger context of the health care system, including e.g. the organisation of health care, partnership with health care providers and managers, practice of cost-effective health care, health economics, and resource allocations.	12-توظیف الموارد المتاحة بكفاءة و تنمیتها والعمل على إیجاد موارد جدیدة
12- Demonstrate in depth awareness of public health and health policy issues including	13-الوعي بدوره في تتمية المجتمع والحفاظ

independent ability to improve health care, and identify and carryout system-based improvement of care.	على البيئة
13- Show model attitudes and professionalism.	14-التصرف بما يعكس الالتزام بالنزاهة و المصداقية و قواعد المهنة
 14- Demonstrate commitment for lifelong learning and maintenance of competence and ability for continuous medical education and learning in subsequent stages and in Neurology or one of its subspecialties. 15- Use recent technologies to improve his practice in Neurology. 	15−الالتزام علمه و خبراته للآخرين

2- Academic standards

Faculty ARS	NAQAAE General ARS for postgraduate Programs
2.1. A- Established, updated and evidence- based theories, basics and developments of Neurology and relevant sciences.	2-1-أ- النظريات و الأساسيات والحديث من المعارف في مجال التخصص والمجالات ذات العلاقة
2.1. B- Basic, methods and ethics of medical research.	2-1-ب -أساسيات و منهجيات و أخلاقيات البحث العلمي و أدواته المختلفة
2.1. C- Ethical and medicologal principles of medical practice related to Neurology.	2-1-ج- المبادئ الأخلاقية و القانونية للممارسة المهنية في مجال التخصص
2.1. D- Principles and measurements of quality in Neurology.	2-1-د مبادئ و أساسيات الجودة في الممارسة المهنية في مجال التخصص
2.1. E- Principles and efforts for maintains and improvements of public health.	2-1-هـ - المعارف المتعلقة بآثار ممارسته المهنية على البيئة وطرق تتمية البيئة وصيانتها
2.2. A- Application of basic and other relevant science to solve Neurology related problems.	2-2-أ -تحليل و تقييم المعلومات في مجال التخصص و القياس عليها و الاستنباط منها
2.2.B- Problem solving based on available data.	2-2-ب - حل المشاكل المتخصصة استنادا علي المعطيات المتاحة
2.2.C- Involvement in research studies related to Neurology.	2-2-ج -إجراء دراسات بحثية تضيف إلى المعارف
2.2. D- Writing scientific papers.	2-2-د- صياغة أوراق علمية
2.2. E- Risk evaluation in the related clinical practice.	2-2-هـ تقييم المخاطر في الممارسات المهنية
2.2.F- Planning for performance improvement in Neurology.	2-2-و -التخطيط لتطوير الأداء في مجال التخصص
2-2-G- Creation and innovation in the Neurology.	2-2-ز - الابتكار /الإبداع

2.2 H. Evidones has ad discussion	
2.2. H- Evidence – based discussion.	2-2-ح- الحوار والنقاش المبني علي
	البراهين والأدلة
2.2.I- Discussion making in different situations	2-2-ط -اتخاذ القرارات المهنية في سياقات
related to Neurology.	#
-	مهنية مختلفة

system.	

Program ARS versus program ILOs

Comparison between ARS- ILOS for medical doctorate for Neurology

(ARS)	(ILOs)
2-1- Knowledge and understanding	2-1- Knowledge and understanding
2-1-A- Established, updated and evidence-based Theories, Basics and developments of v and relevant sciences.	2-1-A- Demonstrate in-depth knowledge and understanding of theories, basics and updated biomedical, clinical epidemiological and socio behavioral science relevant to his Neurology as well as the evidence — based application of this knowledge to patient care.
2-1-B Basic, methods and ethics of medical research.	2-1-B- Explain basics, methodology, tools and ethics of scientific medical, clinical research.
2-1-C- Ethical and medicologal principles of medical practice related to Neurology field.	2-1-C- Mention ethical, medico logical principles and bylaws relevant to his practice in the field of Neurology.
2-1-D- Principles and measurements of quality in the Neurology field.	2-1-D- Mention principles and measurements of quality assurance and quality improvement in medical education and in clinical practice of Neurology.
2-1-E -Principles and efforts for maintains and improvements of public health.	2-1-E- Mention health care system, public health and health policy, issues relevant to this speciality and principles and methods of system — based improvement of patient care in common health problems of the field of Neurology.
2-2- Intellectual skills: 2-2-A-Application of basic and other	2-2- Intellectual skills: 2-2-A- Apply the basic and clinically

relevant science to solve Neurology related problems.	supportive sciences which are appropriate to Neurology related conditions / problem / topics.
2-2-B- Problem solving based on available data.	2-2-B- Demonstrate an investigatory and analytic thinking "problem – solving "approaches to clinical situation related to Neurology.
2-2-C - Involvement in research studies related to the Neurology.	2-2-C- Plan research projects.
2-2-D Writing scientific papers.	2-2-D- Write scientific paper.
2-2-E- Risk evaluation in the related clinical practice.	2-2-E- Participate in clinical risk management as a part of clinical governance.
2-2-F- Planning for performance improvement in the Neurology field.	2-2-F- Plan for quality improvement in the field of medical education and clinical practice in Neurology.
2-2-G- Creation and innovation in the Neurology field.	2-2-G- Create / innovate plans, systems, and other issues for improvement of performance in his practice.
2-2-H- Evidence – based discussion.	2-2-H- Present and defend his / her data in front of a panel of experts.
2-2-I- Decision making in different situations related to Neurology fields.	2-2-I- Formulate management plans and alternative decisions in different situations in the field of the Neurology.

continuous (ILOS) 2-3- Clinical skills: 2/3/1/Practical skills (Patient care :)

- 2-3-A- MD students must be able to provide extensive level of patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health extensive level means in depth understanding and from basic science to evidence based clinical application and possession of skills to manage independently all problems in his field of practice.
- **2-3-B-** Master patient care skills relevant to Neurology for patients with all diagnoses and procedures.
- 2-3-1-A- Provide extensive level of patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. p.s. Extensive level means in-depth understanding from basic science to evidence based clinical application and possession of skills to manage independently all problems in field of practice.
- **2-3-1-B-** Provide extensive level of patient care for patients with all common diagnoses and for uncomplicated procedures related to Neurology.
- 2-3-1-C- Provide extensive level of patient care for non-routine, complicated patients and under increasingly difficult circumstances, while demonstrating compassionate, appropriate and effective care.
- **2-3-1-D-** Perform diagnostic and therapeutic procedures considered essential in the field of Neurology.
- **2-3-1-E-** Handles unexpected complications, while demonstrating compassion and sensitivity to patient needs and concerns.
- **2-3-1-F-** Communicate effectively and demonstrate caring and respectful behaviors when interacting with patients and their families in the Neurology related situations.
- 2-3-1-G- Gather essential and accurate

- information about patients of the Neurology related conditions.
- 2-3-1-H Make informed decisions about diagnostic and therapeutic interventions based on patient information and preferences, up-to-date scientific evidence and clinical judgment for the Neurology related conditions.
- **2-3-1-I-** Develop and carry out patient management plans for Neurology related conditions.
- **2-3-1-J-** Counsel and educate patients and their families about Neurology related conditions.
- **2-3-1-K-** Use information technology to support patient care decisions and patient education in all Neurology related clinical situations.
- **2-3-1-L-** Perform competently all medical and invasive procedures considered essential for the Neurology related conditions / area of practices.
- **2-3-1-M-** Provide health care services aimed at preventing the Neurology related health problems.
- **2-3-1-N-** Lead health care professionals, including those from other disciplines, to provide patient-focused care in Neurology related conditions.

- **2-3-C-** Write and evaluate reports for situations related to the field of Neurology.
- 2-3-1-O- Write competently all forms of patient charts and sheets including reports evaluating these charts and sheets. (Write and evaluate a consultation note, Inform patients of a diagnosis and therapeutic plan, completing and evaluating comprehensive timely and legible medical records).

2-4- General skills

2-4-A- Master practice-based learning and improvement skills that involves investigation and evaluation of their own patient care, appraisal and assimilation of scientific evidence, improvements in patient care and risk management

2/3/2 General skills

- **2-3-2-A-** Demonstrate the competency of continuous evaluation of different types of care provision to patients in the different area of Neurology.
- **2-3-2-B** Appraise scientific evidence.
 - **2-3-2-C-** Continuously improve patient care based on constant self-evaluation and life-long learning.
- **2-3-2-D**. Participate in clinical audit and research projects.
- **2-3-2-E-** Practice skills of evidence-based Medicine (EBM).
- 2-3-2-G- Design logbooks.
- **2-3-2-H-** Design clinical guidelines and standard protocols of management.
- **2-3-2-I-** Appraise evidence from scientific studies related to the patients' health problems.

2-4-B- Use competently all information sources and technology to improve his practice.	 2-3-2-J- Apply knowledge of study designs and statistical methods to the appraisal of clinical studies. 2-3-2-K- Use information technology to manage information, access online medical information; for the important topics.
2-4-C- Master skills of teaching and evaluating others.	2-3-2-F- Educate and evaluate students, residents and other health professionals.
2-4-D- Master interpersonal and communication Skills that result in effective information exchange and teaming with patients, their families, and other health professionals.	 2-3-2-L- Master interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, and health professionals, including:- Present a case.
	 Write a consultation note.
	 Inform patients of a diagnosis and therapeutic plan Completing and maintaining comprehensive. Timely and legible medical records. Teamwork skills.
	2-3-2-M- Create and sustain a therapeutic and ethically sound relationship with patients.
	2-3-2-N - Elicit and provide information using effective nonverbal, explanatory, questioning, and writing skills.
	2-3-2-O- Work effectively with others as a member or leader of a health care team or other professional group.
2-4-E- Master Professionalism behavior, as manifested through a commitment to carrying out professional responsibilities,	2-3-2-P- Demonstrate respect, compassion, and integrity; a responsiveness to the needs of patients and society.

adherence to ethical principles, and sensitivity to a diverse patient population.	 2-3-2-Q- Demonstrate a commitment to ethical principles including provision or withholding of clinical care, confidentiality of patient information, informed consent, and business practices. 2-3-2-R- Demonstrate sensitivity and responsiveness to patients' culture, age, gender, and disabilities.
2-4-F- Demonstrate an awareness of and responsiveness to the larger context and system of health care and the ability to effectively use system resources to provide care that is of optimal value. 2-4-G- Participate in improvement of the education system.	2-3-2-S- Work effectively in health care delivery settings and systems related to Neurology including good administrative and time management. 2-3-2-T- Practice cost-effective health care and resource allocation that does not compromise quality of care. 2-3-2-U- Advocate for quality patient care and assist patients in dealing with system complexities. 2-3-2-V- Design, monitor and evaluate specification of under and post graduate courses and programs.
2-4-H- Demonstrate skills of leading scientific meetings including time management	2-3-2-W- Act as a chair man for scientific meetings including time management 2-3-2-S- Work effectively in health care delivery settings and systems related to Neurology including good administrative and time management.
2 -4-O- Demonstrate skills of self and continuous learning .	From A to H

Annex 7, Additional information:

- ☑ Department information: Neurology and Psychiatry department is divided into many specialized equipped units i.e.:
- ❖ Neurological patients' wards: 72 beds.
- Weekly 3 out patients' neurology clinics (new patients, follow up post discharge appointments, discharged critical care patients Follow up clinic)
- ❖ Weekly 2 epilepsy out patient clinic.
- Stroke ICU (24 beds)
- ❖ Neurophysiology unit (equipped with computerized Digital EEG – conventional EEG and Video monitoring EEG, 2 Nihon Khoden for Neurophysiology testing (evoked potential, EMG, NCVs, F wave......) and magnetic lab (diagnostic and therapeutic tools).
- Sleep Lab
- Psychatric patients wards 47 beds.
- ❖ Addiction patients wards 10 beds.
- Weekly 3 days out patients' psychiatry clinics (new patients, follow up post discharge appointments, discharged critical care patients Follow up clinic.
- ❖ 3 days/Week out patients' psychiatry clinics for treatment and follow up of chronic psychiatric patients.
- Psychomotery lab.

☒ Staff members:

Thirty four staff members: 13 Psychiatrists and 21 Neurologists.

They are including 16 professors, 6 assistant professors, 12 lectures.

☒ Opportunities within the department:

- Scientific Library (Neurology and Psychiatry Text Books and journals periodicals), MD, MSc thesis,
- Seminar room with data show
- Electronic Library of Scientific Seminars, case presentations.
- Audiovisual skills teaching unit (neurological and psychiatric examination- basic science and medical knowledge).
- New center.

☑ Department quality control insurance for completing the program: Evaluation by:

- The director of program (head of department),
 Coordinators of Program, and each module, and staff members.
- Regular assessments.
- Log book monitoring.
- External assessment.
